

EC Track Installation Instructions

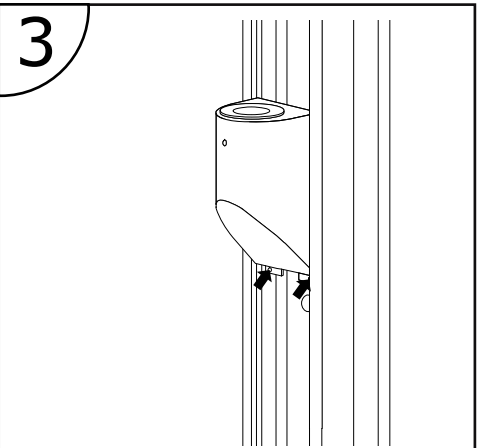

www.ergomart.com | 888 420 3200

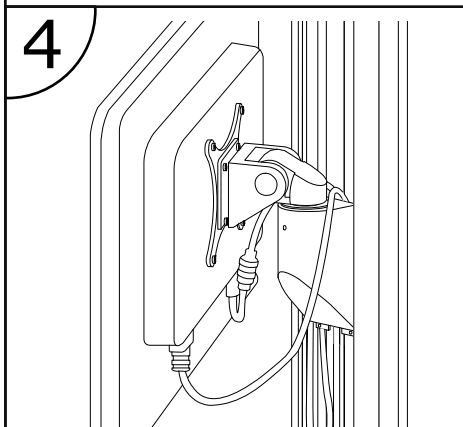

1
Align track mounting holes with wall stud. Be sure to fasten the track directly to a wall stud.
* Fasteners not provided by Ergomart.

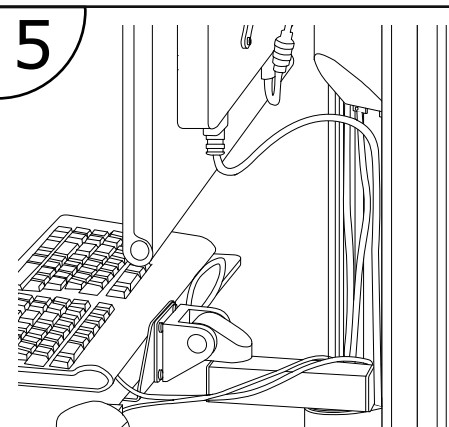

2
Slide track mounts (or other Ergomart brackets and components) into the track slots from either end of the wall track.

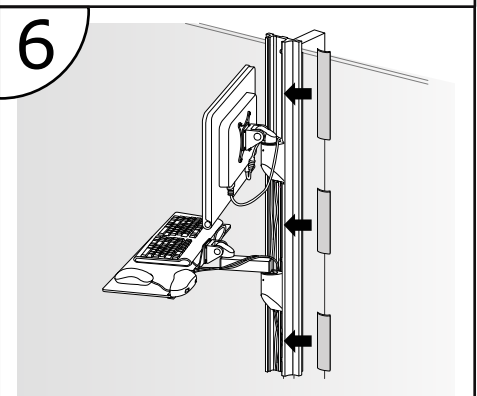

3
Secure by tightening the set screws provided with each component.

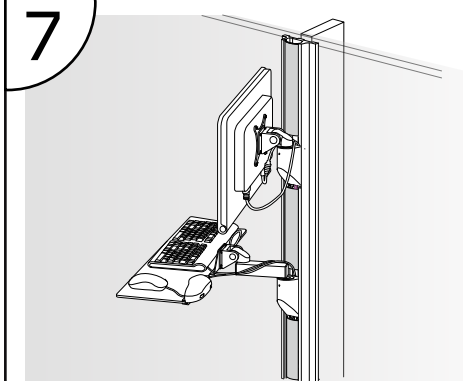

4
Load the mounts with other components and computer peripherals.

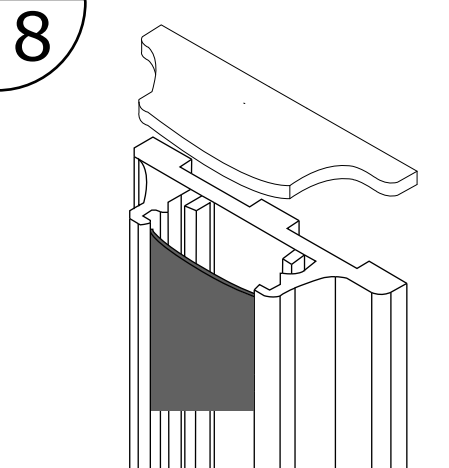

5
Run wires and cords from devices behind the track mounts and out either end of the track.

6
Cut the plastic wire management strip into lengths about one half inch shorter than the spaces between the mounts and/or the ends of the wall track.

7
Insert the covers into the track mount slots. Place one edge into one side, bend slightly. Then starting at the top, pop the other edge in, working the way down.

8
Press end cap onto each end of the wall track.
